e-Business Solutions

Why You Need This Service

Ripplemail is an easy-to-use web-based email database management system that is useful for:

- Communicating with members of your organization
- Sending regular memos with consistent branded design
- Sending press releases to your PR mailing list
- Announcing specials to interested recipients
- Sending newsletters via email
- Managing your contacts database online

The Service Package Consists Of:

- Mailer engine license
- On-demand reports
- Tools for sending broadcast messages by list segments
- Utilities for editing, adding & deleting records
- Monthly hosting of the database
- Regular backups
- Export features
- Online, password-protected access to your database
- Full customer support

Remember, this is a web-based solution, so you have no software to install, no hardware to buy and no special skills to acquire. We make business easier for you.
